ABSTRACT

Previous studies on celebrity endorsement have focused on merits of the celebrity endorser as the key factors for predicting endorsement effectiveness. This research extends previous research by exploring the effects of the consumer’s para-social interaction (PSI) with the celebrity. Based on the Source Credibility Model, the proposed model takes PSI as the core variable and examines its relationship with self-brand connection and ideal congruency. Two studies were conducted using online questionnaires to collect consumers’ self-reported data. Study 1 tested a partial model using sports celebrities. Study 2 tested the full model using entertainment celebrities. Study 1 had 605 respondents and study 2 had 387 respondents. The respondents were young, well-educated and included both fans and no-fans of the selected celebrities. The results showed that consumer-celebrity PSI was an essential factor in the endorsement process. The perceived attractiveness of a celebrity was an antecedent to PSI, which in turn allowed the consumer to establish a personal connection with the endorsed brand and resulted in positive brand attitude. Furthermore, the results showed that consumers tend to have stronger PSI with a celebrity when they hold a higher degree of ideal congruity with the celebrity. Finally, results indicated that the context in which the celebrity was shown with the brand had significant effects, with a real-life context yielding stronger effects than an ad endorsement context or a product placement context. In sum, this research extended the source attractiveness model by clarifying the endorsement process to include consumer-celebrity PSI and brand-related responses. It also contributed to the audience-celebrity PSI theory. In addition, this research revealed the potential impact of celebrity-brand associations in real-life contexts on endorsement effectiveness, thus providing new insights for research related to the various forms of celebrity endorsement.
# TABLE OF CONTENTS

## CHAPTER 1: INTRODUCTION

1. RESEARCH BACKGROUND  
   1.1. Popularity of Celebrity Endorsement  
   1.2. Research Issues Related to Celebrity Endorsement  
   1.3. Main Concepts of the Research  

2. RESEARCH GAP  

3. RESEARCH QUESTION AND PURPOSE  

4. RESEARCH INNOVATION  

5. STRUCTURE OF THE THESIS  

## CHAPTER 2: LITERATURE REVIEW AND HYPOTHESES DEVELOPMENT  

1. INTRODUCTION  

2. SIGNIFICANCE OF CELEBRITY ENDORSEMENT ADVERTISING  

3. BASIC THEORIES OF CELEBRITY ENDORSEMENT  
   3.1. Source Credibility Model  
   3.2. Meaning Transfer Model  
   3.3. Match-up Hypothesis  

4. CORE CONCEPT OF THE RESEARCH  
   4.1. Origins and Definition of Para-social Interaction  
   4.2. Characters and Dimensions of PSI  
   4.3. Relationship between PSI and Interpersonal Interaction  
   4.4. Two Paradigms of PSI  
   4.5. Factors Affecting the Strength of PSI  
   4.6. Effect of PSI on Persuasion
CHAPTER 3: OVERVIEW OF STUDIES

CHAPTER 4: STUDY 1

1. INTRODUCTION
2. METHOD
   2.1. Measures
   2.2. Pretest of Celebrity Selecting
   2.3. Data Collection
3. RESULTS
   3.1. Descriptive Statistics
   3.2. Relationship between Source Credibility and PSI
   3.3. Moderation Effect of Ideal Congruity
4. REPLICATE TEST
5. SUMMARY

CHAPTER 5: STUDY 2

1. INTRODUCTION
2. METHOD
   2.1. Measures for Continuous Variables
   2.2. Pretest of Celebrity Selecting
   2.3. Pretest of Product Category Selecting
4.4. New Avenues of Celebrity-brand Association 207

5. MANAGERIAL IMPLICATIONS 209
   5.1. PSI and Customer Loyalty 209
   5.2. Focusing on Users’ Emotional Needs and User Experience 212
   5.3. Considering Ideal Congruity When Selecting an Endorser 216
   5.4. Creating New Types of Celebrity-brand Association 217

6. LIMITATIONS AND SUGGESTIONS FOR FUTURE RESEARCH 221
   6.1. Limitations and Suggestions in terms of Theory Construction 222
   6.2. Limitations and Suggestions in terms of Variable Measurement 225
   6.3. Limitations and Suggestions in terms of Research Design 228

7. CONCLUSION 229
